

## Fake Selfies: Remove.bg & PPT

*Tech Tip*

1. In a **web browser**, go to **remove.bg** and upload your saved image.
2. Check the new image. Edit it if need be. Then **download**.
3. In **PowerPoint**, find and **insert a background image** representing where you want the selfie to be taken. **Resize** the image to fill the slide.
4. **Insert** the image you downloaded from remove.bg. **Resize and adjust** this image onto the background image so it looks correct.
5. **Save the slide as an image**: select **Save As**, browse to your save location, and name the file. Then, from the drop down options, select the **.jpeg or .png** option and **Save**.
